Sharpening Sight, Shaping Futures

Eye screening camps for rural schools in Odisha

According to the IAPB, over 450 million children worldwide suffer from vision impairment, significantly affecting their health, education, and future prospects. The situation is even more critical in rural areas where access to affordable vision care is often limited.

Care Netram takes an initiative to educate children in rural communities about the importance of eye care and nutrition for eye health. We also provide free eye screenings and dispense free spectacles, ensuring that these children have the clear vision they need for a brighter future.

Your Vision, Our Mission

Bringing good vision & clear eyesight in remote rural areas of India

Our mission is to bring clear vision and better eye care to underserved communities. With free screenings and spectacles, we aim to make a lasting impact on the health and future of every participant.

Together, we're making a lasting difference in the lives of those who need it most. Thank you for supporting our mission to bring clearer vision and brighter futures to every corner of our community.

Restored Clarity and Joy to a Rural Elder's Life

In the remote village of Belgum, Koraput, 72-year-old woman Supari Bhatra faced the daily challenge of blurred vision. Her vision problems made even simple tasks difficult. This made her dependent on her children and grandchildren.

When Care Netram team visited her village, they provided Supari with a pair of GVG glasses. As she put them on, her eyes widened in awe as the world around her came into sharp, beautiful focus. The intricate details of her surroundings, once a blur, now sparkled with clarity and vibrancy. Grateful and moved, Supari thanked the Care Netram team for restoring her sight and helping her

Clear Vision Renewed

Fula Kumari Munda's Daily Work

Fula Kumari Munda is a dedicated and hardworking woman who has spent years gathering sal tree leaves. She crafts these leaves into various plates and sells them at the market to support her daily life. However, as she aged, her vision deteriorated, making it increasingly difficult to continue her work.

She attended the Care Netram camp and was tested for vision issues. After receiving a pair of corrective glasses, she was thrilled to find that her vision had greatly improved. Now, she can see clearly and continue her work with renewed joy. She was deeply touched and blessed the Care Netram team for their support and service.

Delivering Happiness to People with Good Vision

Fulama Majhi, a 70-year-old resident of Skhudia village in Koraput, faced the daily challenge of poor distance vision, which made simple tasks and daily activities increasingly difficult. Her struggle to see clearly from afar not only impacted her quality of life but also her independence and well-being.

When the Care Netram team visited Skhudia village, they brought hope and a solution. Our skilled vision technician conducted a thorough eye examination and identified the extent of Fulama's vision issues. We provided her with Good Vision Glasses designed to improve distance vision. With her new glasses, Fulama could see clearly from afar, and her daily life improved significantly. The newfound clarity not only improved her vision but also restored happiness.

Happy Students from Rural Odisha

Imagine straining to decipher letters on a board from a distance. For many children, this struggle makes studying and learning increasingly difficult, leading to diminished interest in their education and poor academic performance. Unfortunately, limited resources and support often prevent them from accessing the vision care they need.

Thanks to our timely intervention, children from rural Odisha received free eye exams and glasses. Their smiles say it all! With their new vision-supporting glasses, they can see clearly once again, reigniting their enthusiasm for learning and paving the way for brighter academic futures.

Care Netram **Team Training** and **Strategy Session**

At Care Netram, our commitment to excellence begins with our team. During our recent **Team Training and Strategy Session**, we focused on enhancing our skills, refining our approach, and aligning our efforts to better serve our communities.

This session was more than just training—it was an opportunity to foster collaboration, innovate together, and set a clear vision for our future. With a strong and unified team, we are better equipped to make a lasting impact on the lives of those who need it most.

Giving the Gift of Vision

Our support ensures that individuals with cataracts can receive life-changing surgeries at no cost, restoring their vision and independence. By covering the expenses of these crucial procedures, we help eliminate barriers to clear sight, allowing people to regain their mobility, productivity, and quality of life. Through our sponsorship, we're not only providing medical care but also fostering brighter futures and stronger communities.

Making a **Positive Impact** Through our **Vision Care Centres**

Each visit to our Vision Care Centres represents a step toward a clearer & brighter future

Our centres offer comprehensive eye exams, corrective lenses, and referrals to hospitals for various vision conditions, ensuring that people receive the care they deserve. By addressing vision issues early and providing accessible, affordable care, we enhance quality of life, empower individuals to lead more independent lives, and contribute to healthier, more vibrant communities.

**Let's work together to ensure a better
life for the visually impaired!**
