CELEBRATING THE WORLD SIGHT DAY

On World Sight Day, Care Netram took proactive steps to raise awareness about eye health. We conducted eye screening camps in remote areas, ensuring vital care reached those in need, and organized road rallies to highlight the importance of maintaining healthy vision.

SPREADING VISION AND HOPE

Gandhi Jayanti Eye Care Camp

On 2nd october, in honor of Gandhi Jayanti, Care Netram, in collaboration with Jagmohan charitable trust, organized A free eye check-up camp in Rasulgarh, Bhubaneswar. The event was graced by Care Netram's Vice President Mr. Piyush, Assistant Vice President Mr. Devashish, and Manager Mr. Gopinath, who interacted with the trust members and the local community.

During the camp, 60+ individuals received eye screenings, and 20+ people purchased affordable spectacles. The attendees expressed their happiness and gratitude for the quality service provided, marking yet another successful step in care netram's mission to ensure better vision for all.

BRINGING CLARITY TO YOUNG EYES

Good & Healthy Eyesight For School Children

At Care Netram, we believe every child deserves the gift of clear vision. Our dedicated team regularly reaches out to rural school children, offering free eye checkups to detect vision problems early. For children requiring further care, we provide cataract surgeries and ensure access to affordable spectacles, making quality eye care a reality for all.

By addressing eye health issues among students, we're not just improving vision but also empowering them to excel in education and achieve their dreams with clarity. Together, we're shaping a brighter, clearer future!

BRINGING VISION TO LIFE

A Glimpse into the Care Netram's Eye Camp on World Sight Day

On 10th October 2024, Care Netram, with support from BMC Nayapalli corporator and volunteers, organized a free eye camp inaugurated by MLA Mr. Ananta Narayana Rout. Of the 51 individuals screened, 22 required spectacles, with 16 purchasing affordable ones, while nine cataract patients were scheduled for surgery the next day.

The community expressed heartfelt gratitude to the MLA, and Care Netram for their efforts in making quality eye care accessible. This initiative highlighted Care Netram's dedication to brighter, healthier futures.

EXTENDING QUALITY EYE CARE TO THE UNDERPRIVILEGED MASS OF INDIA

Care Netram is on a mission to ensure that quality eye care reaches every corner of India, especially the underprivileged who need it the most. Through our initiatives, we bridge the gap between accessible eye care and underserved communities by providing free eye checkups, affordable spectacles, and cataract surgeries.

By addressing preventable vision issues, we empower individuals to lead healthier lives and unlock their true potential. Our efforts go beyond eye care—they restore hope, clarity, and a brighter outlook for countless families across the nation. Together, we're building a vision of equality and care for all.

THE BAMBOO ARTISTS GET BACK CLEAR VISION

Bhadu Devi and Sukariya Devi are skilled bamboo artisans who also teach others the intricate art of bamboo crafts. For months, their declining vision made it difficult for them to continue their work. Seeking help, they attended our eye care camp, where their eyes were tested. They got GoodVision Glasses and regained their ability to see clearly.

With their vision restored, both artisans are back to creating beautiful bamboo designs and inspiring others through their craft. Their gratitude reminds us why we strive to make quality eye care accessible. Thank you, Bhadu and Sukariya Devi, for sharing your story!

THE GIFT OF SIGHT

Uncorrected vision issues, such as cataract formation, rob individuals of the ability to earn a livelihood and live a fulfilling life. This not only results in complete blindness but also leaves them dependent on others for their daily needs.

Empowering rural lives through the transformative gift of sight, Care Netram is delivering sight-restoring surgeries to those in greatest need. Our mission is to empower economically disadvantaged individuals by enabling them to earn a livelihood through improved vision.

MEET THE SPECIALLY-ABLED, RAHAS KISAN

A differently-abled individual had been struggling with poor distance vision for over a year but was unable to seek help due to financial constraints. When Care Netram organized a free eye check-up camp in his village, he learned about it from fellow villagers and decided to attend.

During the camp, his eyes were tested, and Care Netram provided him with free prescription glasses. Now, with improved vision, he can see clearly and feels a renewed sense of joy and independence. Grateful for the support, he expressed heartfelt thanks to Care Netram for transforming his life.
